

NPK (20-20-15) Fertilizer

NPK 20-20-15 compound is granular in shape and is a balanced fertilizer with equal amounts of phosphorus, potassium, and high nitrogen content. The hardness of the fertilizer is 6-8N. The NPK fertilizers' granularity between 2-4mm is 90% min. These fertilizers are formulated with the highest quality standards, modern technology, and the purest raw materials. NPK 20-20-15 is a balanced fertilizer suitable in the complete life cycle of the plant, to guarantee the most qualitative and quantitative yield.

Application

- 1) As a quick-acting fertilizer, NPK compound fertilizer is widely used in agriculture. Growers can adjust fertilizer formula reasonably according to different crop growth conditions, dramatically improving nutrient utilization rate. More importantly, the NPK granular fertilizer operation does not require manual labor, significantly saving labor costs. Active ingredients can reach 100%
- 2) Different fertilization methods (such as fertigation, spray irrigation, and foliar application) save time the most.
- 3) It is easier to be absorbed by plants. High-use efficiency makes good use of fertilizer costs.
- 4) Water soluble and chelated TE can avoid the antagonism with phosphorus.

Properties	Results
Appearance	Light brown granules
Total Nitrogen	20 % Min
Total Phosphorous (P2O5)	20 % Min
Water Soluble Potassium (K2O)	15 % Min
Moisture	0.5% Max
Size (2-4mm)	90.0% Min
Static Granule Strength	4 Mpa
Free Flowing	100%
Ammonia Nitrogen	8
Chlorine	<1
Urea Nitrogen	12

Benefits

The compound fertilizer is produced from the purest ingredients and is free of sodium, chlorine, and heavy metals. The NPK fertilizers promote plants to absorb nutrients during sprouting and increase the utilization efficiency of nitrogen and phosphorus nutrients. The component in nitro-phosphate can promote the movement of phosphorus and increase its space efficiency. Increase its nitrous utilization and absorption quantity of plants.

Colors

The product can be customized per the color the client requires for an extra charge.

Packing

25kg, 50 Kg bags small bags, or Jumbo bags or as requested.

Storage

- 1) Prevent from moisture absorption, keep away from heat,
- 2) Keep in a well-ventilated area, do not encounter acids and alkaline substances,
- 3) Protect from dust.
- 4) Ensure bags are sealed and in good condition
