NPK (25-9-9) Fertilizer

NPK 25-9-9 compound is granular in shape and is a balanced fertilizer with equal amounts of phosphorous and potassium and high nitrogen content. The hardness of the fertilizer is 6-8N. The NPK fertilizers' granularity between 2-4mm is 90% min. These fertilizers are formulated with the highest quality standards, modern technology, and the purest raw materials. NPK 25-9-9 is a balanced fertilizer suitable in the complete life cycle of the plant, to guarantee the most qualitative and quantitative yield.

Application

- 1) As a kind of quick-acting fertilizer, NPK compound fertilizer is widely used in agriculture. Growers can adjust fertilizer formulas reasonably according to different crop growth conditions, significantly improving nutrient utilization. More importantly, the NPK granular fertilizer operation does not require manual labor, significantly saving labor costs.
- 2) Active ingredients can reach 100%
- 3) Different ways of fertilization (such as fertigation, spray irrigation, and foliar application) save time to the most.
- 4) It is easier to be absorbed by plants. High-use efficiency makes good use of fertilizer costs.
- 5) Water soluble and chelated TE can avoid the antagonism with phosphorus.
